EDUCATION

Kongu Engineering College

B.Tech Artificial Intelligence and Machine Learning *GPA: 8.15 / 10*

Perundurai, India

2021 - 2025

EXPERIENCE

MapleLabs (A Xoriant Company)

Associate Software Engineer

Bengaluru, India

Nov 2025 - Present

- Designed and maintained scalable REST APIs using FastAPI and Flask, supporting NLP and LLM-backed microservices consumed by downstream engineering teams
- Integrated LLM inference endpoints and NLP preprocessing pipelines into backend services, reducing manual data processing overhead
- Managed containerized service deployments using Docker across development and test environments, ensuring environment reproducibility and deployment consistency
- Modeled and queried structured and unstructured data using MySQL and MongoDB for application metadata and ML pipeline artifacts
- Self-initiated and shipped an internal multi-service developer tools platform (FastAPI + Flask, 30+ REST endpoints) adopted organically by the team — spanning Jenkins CI tracking, async test report conversion, Apache log analytics, and Markdown documentation hosting
- Participated in Agile sprints, pull request reviews, and iterative feature delivery cycles within a cross-functional engineering team

MapleLabs (A Xoriant Company)

Software Engineering Intern

Bengaluru, India

Jun 2025 - Oct 2025

- Built REST APIs using FastAPI and Flask for ML inference and data processing features, delivering endpoints integrated into production backend services
- Developed Python-based ETL and data processing scripts for NLP experimentation, dataset preparation, and model evaluation workflows
- Reduced model inference latency by applying batching strategies and INT8 quantization techniques during experimentation, improving throughput
- Maintained version control hygiene using Git and collaborated within an Agile team across sprint-based delivery cycles
- Deployed and validated services on Docker containers and AWS EC2 instances, gaining practical cloud deployment and infrastructure experience

SKILLS

Languages & Core:	Python 3.x, TypeScript, Bash, REST API, Microservices, OOPs, System Design
ML & NLP:	PyTorch & Tensorflow, Hugging Face, Fine-tuning, Embeddings, Fusion Models
LLMOps & GenAI:	RAG, LangChain, LlamaIndex, Ollama, Prompt Engineering, MCP, Agentic AI
Backend Frameworks:	FastAPI, Flask, Django (Basics), Webex and Telegram Bot Framework, ASGI / WSGI
Data & Libraries:	pandas, openpyxl, NetworkX, Trimesh, Pillow, Chart.js
Databases:	MySQL, MongoDB, PostgreSQL (Basics), Vector Databases (FAISS, Chroma)
Backend Engineering:	AAA, Email Workflows, Rate Limiting, Background Tasks, Webhooks
DevOps & Infrastructure:	Docker, Linux, Bash Scripting, Nginx, Git, Jenkins, AWS EC2, Azure, CI/CD

PROJECTS

Internal Developer Tools Platform *Python, FastAPI, Flask, ASGI, Webex Bot, Jenkins API, pandas, openpyxl, Bash Scripting*

Self-initiated, team-adopted multi-service productivity platform built outside of official deliverables — covering CI monitoring, test reporting, log analytics, and documentation.

CoClaw - AI Coding Assistant with Persistent Memory *TypeScript, VS Code Extension API, GitHub Copilot API, LLMOps, Agentic AI, MCP*

<https://co-claw.readthedocs.io/en/latest/>

VS Code extension adding a persistent, workspace-aware memory layer to GitHub Copilot — enabling automatic context retention and remote agent control across coding sessions.

Form Pulse - AI Quiz Generator *Python, FastAPI, RAG, Embeddings, FAISS, LLMOps, Docker, Nginx*

GenAI-powered quiz generation platform using LLMs and retrieval-augmented generation for contextual, document-grounded question creation.

Thanglish-to-English Translator *NLP, Seq2Seq, Attention Mechanism, PyTorch, Hugging Face, Flask*
NLP translation system for code-mixed Tamil-English (Thanglish) text using sequence-to-sequence deep learning.

FileShare Pro - Secure File Sharing Platform *Python, Flask, Flask-Session, Flask-Mail, Authentication, PWA, Pillow*
<https://filesharepro.pythonanywhere.com/>
Full-stack Flask file sharing platform with user accounts, file bundles, expiration controls, admin dashboard, and PWA support.

HTMLDrop - Instant HTML & Slide Deck Hosting *Python, Flask, REST API, Authentication, SMTP, Rate Limiting, Jinja2*
<https://htmldrop.pythonanywhere.com/>
Single-file Flask web application for sharing self-contained HTML pages and slideshow decks with shareable links, user accounts, and admin controls.

3D Mesh Defect Detection - Multi-Modal Deep Learning *TensorFlow, CNN, GNN, Multi-Modal Fusion, ResNet, Trimesh, Deep Learning*
Multi-modal deep learning system for automated defect detection in 3D mesh files, combining CNN-based image classification with GNN-based mesh analysis.

Log Analyzer - LLM-Based Semantic Log Analysis *LLMOps, Embeddings, FAISS, Ollama, Python, Anomaly Detection*
Semantic log analysis tool using LLMs and embedding-based similarity search for intelligent anomaly detection in system logs.

LEADERSHIP & EXTRACURRICULARS

Secretary - AI Coding Club

AI Department, Kongu Engineering College
2022 - 2025
